

APAC IPv6 Intelligence Summit

Generated: January 30, 2026

Executive Summary

This intelligence briefing provides a tactical overview of IPv6 adoption across the Asia-Pacific region. The data below is derived from real-time DNS and Web connectivity scans of government and academic infrastructure.

Regional Readiness Leaderboard

Rank	Economy	Score	Readiness Level
#1	HK	48.5	Low
#2	WS	30.0	Low
#3	SG	26.4	Low
#4	MY	21.6	Low
#5	NZ	19.0	Low
#6	TH	19.0	Low
#7	VN	17.1	Low
#8	MV	16.0	Low
#9	PG	13.3	Low
#10	ID	12.7	Low

Strategic Recommendation

Economies with scores below 50 are advised to implement the 'IPv6-Mostly' transition architecture immediately. This involves enabling DHCPv4 Option 108 to signal IPv6 preference to modern clients, allowing for the gradual retirement of legacy IPv4 assignments.
