

# APAC IPv6 Intelligence Summit

Generated: January 24, 2026

## Executive Summary

This intelligence briefing provides a tactical overview of IPv6 adoption across the Asia-Pacific region. The data below is derived from real-time DNS and Web connectivity scans of government and academic infrastructure.

## Regional Readiness Leaderboard

Rank	Economy	Score	Readiness Level
#1	HK	64.0	Moderate
#2	WS	45.0	Low
#3	VN	40.0	Low
#4	NZ	31.7	Low
#5	MV	29.5	Low
#6	PG	26.7	Low
#7	PH	26.1	Low
#8	TH	24.0	Low
#9	SG	24.0	Low
#10	MY	20.2	Low

## Strategic Recommendation

Economies with scores below 50 are advised to implement the 'IPv6-Mostly' transition architecture immediately. This involves enabling DHCPv4 Option 108 to signal IPv6 preference to modern clients, allowing for the gradual retirement of legacy IPv4 assignments.
